Product Sheet

Human adenovirus 11 (ATCC® VR-12™)

Please read this FIRST

Storage Temp.
-70°C or colder

Biosafety Level
2

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Human adenovirus 11 (ATCC® VR-12™)

Description

Strain: Slobitski
Classification: Adenoviridae, Mastadenovirus, Human adenovirus B
Original Source:
feces, human
Massachusetts, United States
Depositor: M Schaeffer, DA Stevens

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:
KB cells (ATCC CCL-17)

Effect on Host:
Yes, in vitro effects: Cytopathic effects, refractile rounding, clumping and sloughing
CPE, refractile rounding, clumping and sloughing

Medium:
Virus growth medium: EMEM + 2% FBS (ATCC® 30-2020)

Growth Conditions
Atmosphere: 5% CO_2 in air recommended
Temperature: 37°C
Recommendation for Infection: 2-4 days; For best results cells should be 24 to 48 hours old and 80-90% confluent (not 100% confluent).

Comments

Agglutinates rhesus RBC. Weakly oncogenic. Contains soluble group-specific CF antigen. Efforts at ATCC® to detect polio by antibody-antigen reaction in VR-12 have yielded negative results.

References

References and other information relating to this product are available online at www.atcc.org.

Key Abbreviations

CF, complement fixation
CO_2 (CO2), carbon dioxide
CPE, cytopathic effect
EMEM, Eagles minimum essential medium
FA, fluorescent antibody
FBS, fetal bovine serum
HEK, human embryo kidney
HeLa, human cervical carcinoma cells
KB, human oral epidermoid carcinoma cells
RBC, red blood cells
TC, tissue culture
$TCID_{50}$(TCID[50]), The Tissue Culture Infectious Dose
50% endpoint is the 50% infectious endpoint in cell culture. The $TCID_{50}$ is the dilution of virus that under the conditions of the assay can be expected to infect 50% of the culture vessels inoculated, just as a Lethal Dose 50% (LD_{50}) is expected to kill half of the animals exposed. A reciprocal of the dilution required to yield the $TCID_{50}$ provides a measure of the titer (or infectivity) of a virus preparation.

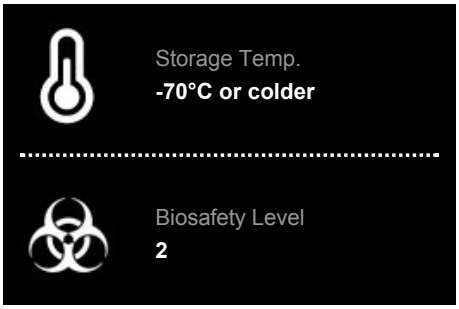
Product Sheet

Human adenovirus 11 (ATCC® VR-12™)

Please read this FIRST



Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Human adenovirus 11 (ATCC® VR-12™)

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at www.atcc.org

Additional information on this culture is available on the ATCC web site at www.atcc.org.
