

Product Sheet

Staphylococcus epidermidis (ATCC®) 12228™

Please read this **FIRST**

Storage Temp.
Frozen: -80°C or colder
Freeze-Dried: 2°C to 8°C
Live Culture: See Propagation Section

Biosafety Level
1

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Staphylococcus epidermidis* (ATCC® 12228™)

Description

Designation: FDA strain PCI 1200

Deposited Name: *Staphylococcus epidermidis* (Winslow and Winslow) Evans

Product Description: Used in media testing and various assays. Organism used in genome sequencing project.

Propagation

Medium

ATCC® Medium 3: Nutrient agar or nutrient broth

Growth Conditions

Temperature: 37°C

Atmosphere: Aerobic

Propagation Procedure

1. Open vial according to enclosed instructions.
2. Using a single tube of #3 broth (5 to 6 mL), withdraw approximately 0.5 to 1.0 mL with a Pasteur or 1.0 mL pipette. Rehydrate the entire pellet.
3. Aseptically transfer this aliquot back into the broth tube. Mix well.
4. Use several drops of the suspension to inoculate a #3 agar slant and/or plate.
5. Incubate the tubes and plate at 37°C for 24 hours.

Notes

Colonies on #3 plates are pinpoint, circular, entire, smooth, raised, low convex, opaque, and glistening. Purified genomic DNA of this strain is available as ATCC® 12228D-5™. This strain is also available as certified reference material ATCC® CRM-12228™.

Several GenBank accessions are available for this item:

1. Nucleotide (GenBank) : AE015929 *Staphylococcus epidermidis* ATCC 12228, complete genome.
2. Nucleotide (GenBank) : U39771 *Staphylococcus epidermidis* 16S-23S ribosomal RNA spacer region.
3. Nucleotide (GenBank) : U90018 *Staphylococcus epidermidis* 16S-23S ribosomal RNA spacer region.
4. Nucleotide (GenBank) : U90019 *Staphylococcus epidermidis* 16S-23S ribosomal RNA spacer region.
5. Nucleotide (GenBank) : U90020 *Staphylococcus epidermidis* 16S-23S ribosomal RNA spacer region.
6. Nucleotide (GenBank) : U90021 *Staphylococcus epidermidis* 16S-23S ribosomal RNA spacer region.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature
