 **Description**

**Deposited Name:** *Salmonella enterica* subsp. *enterica* serovar Typhimurium GFP  
**Antigenic Properties:** I 4,5,12:i:1,2 (Determined by depositor)  
**Product Description:** This clone was derived from ATCC® 14028™ and contains a multicopy vector encoding the green fluorescent protein GFPmut3. This gene is expressed under the control of the P<sub>lac</sub> promoter. This construct has been designed for Gram-negative bacteria fluorescence labeling. Ampicillin resistance gene (*bla*) encoded on a plasmid. Confers resistance to 100 µg/mL ampicillin.

**Vector:** pUCP18-MCSgfpmut3  
**Vector size:** 5.492kb  
**Vector type:** plasmid  
**Marker:** *bla* (ampR)  
**Features:**  
**GFPmut3:** fluorescent maker under the control of P<sub>lac</sub> promoter  
**Origin of replication:** ori from pRO1600  
**Unique restriction sites:** BamHI, EcoRI, EcoRV, SmaI, XhoI.  
**Double restriction sites:** HindIII, PstI, Sall, XbaI.

 **Propagation**

**Medium**  
ATCC® Medium 2853: Nutrient Agar/Broth with 100 mcg/ml Ampicillin  
**Growth Conditions**  
**Temperature:** 37°C  
**Atmosphere:** Aerobic

**Propagation Procedure**

1. Open thawed vial according to enclosed instructions or visit [www.atcc.org](http://www.atcc.org) for instructions.
2. Aseptically transfer the entire contents to a 5-6 mL tube of #2853 broth. Additional test tubes can be inoculated by transferring 0.5 mL of the primary broth tube to these secondary tubes.
3. Use several drops of the primary broth tube to inoculate a #2853 plate and/or #2853 agar slant.
4. Incubate at 37°C for 16 hours.

 **Notes**

This strain produces the green fluorescent protein GFPmut3. This protein has a green or yellow-green color, exhibits fluorescence with UV light (Excitation: 501 nm; Emission: 511nm). Incubate in the dark as broad-spectrum light may inactivate this protein. Longer incubations (24-48h) might be required in order to visualize fluorescence.

Important: a concentration of 100 µg/mL ampicillin must be maintained at all time during culture. Absence or low concentrations of ampicillin will result in plasmid loss. This strain is stable for up to 5 consecutive passages in the recommended culture conditions.

Additional information on this culture is available on the ATCC® web site at [www.atcc.org](http://www.atcc.org).

 **References**

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

 **Biosafety Level: 2**

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

**ATCC Warranty**

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC

**Intended Use**

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

**Citation of Strain**

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Salmonella enterica subsp. enterica serovar Typhimurium GFP* (ATCC® 14028GFP™)

lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

**Disclaimers**

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy.
