

Product Sheet

Bacillus subtilis (ATCC® 15841™)

Please read this **FIRST**

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Bacillus subtilis* (ATCC® 15841™)

Description

Deposited Name: *Bacillus subtilis* (Ehrenberg) Cohn

Propagation

Medium

ATCC® Medium 103: Soybean agar

ATCC® Medium 103: Soybean agar

ATCC® Medium 3: Nutrient agar or nutrient broth

Growth Conditions

Temperature: 37.0°C

Protocol: for phage propagation

Propagation Procedure

1. Open vial according to enclosed instructions.
2. From a single tube of #103 broth (5 to 6 ml), withdraw approximately 0.5 to 1.0 ml with a Pasteur or 1.0 ml pipette and use to rehydrate the pellet.
3. Use 0.1 ml of this suspension to inoculate #103 slants and 0.1 ml to inoculate #103 plates.
4. **Incubate tubes and plates at 37°C, under aerobic conditions, for 24 hours.**
5. After 24 hours of incubation, wash cells from the slant and transfer this broth to a new slant and plate. Incubate another 24 hours under aerobic conditions. This second transfer and incubation is necessary for complete removal of the cryoprotectant, which can inhibit growth.

Notes

Growth on agar at 24 hours yields two colony morphotypes, a mucoid form and a granular form. The mucoid colony appears amorphous with a tacky, mucoid consistency. The granular form, appears as raised, irregular colonies approximately 1-2 mm in diameter, with a finely granular interior. No reversion occurs with subculture.

Cells are nonmotile rods, appearing individually and paired for both colony types.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for
