

Product Sheet

Methylococcus capsulatus (ATCC® 33009™)

Please read this FIRST

Storage Temp.
Frozen: -80°C or colder
Freeze-Dried: 2°C to 8°C
Live Culture: See Propagation

Biosafety Level
1

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Methylococcus capsulatus* (ATCC® 33009™)

Description

Designation: NCIB 11132 [Bath, MC]

Deposited Name: *Methylococcus capsulatus* Foster and Davis

Propagation

Medium

ATCC® Medium 1306: Nitrate mineral salts medium (NMS)

ATCC® Medium 784: AMS (ammonium mineral salts)

Growth Conditions

Temperature: 45°C

Atmosphere: Under a gas mixture of 50% air, 50% methane

Propagation Procedure

1. Immediately prior to working with the culture place the frozen vial at room temperature to thaw.
2. Aseptically transfer the entire contents of the vial into a single broth tube (5-6 mL) of ATCC medium 1306. Additional tubes can be inoculated by transfer of 0.1 mL to slants and 0.5 mL to broth tubes. Plate the rehydrated culture (0.1 mL) onto nonselective medium (to test for purity). When using Medium #1306, use a gas mixture of 50% methane and 50% air.
3. Incubate the culture at 45°C for 3 to 5 days. When using Medium #1306, the culture needs to be fed a mixture of 50% methane and 50% air every 24 to 48 hours for best results.
4. Growth should be detected within 3 to 5 days. No growth should occur on the non-selective plates.

Notes

Medium #784 broth supports growth of this strain, but better growth occurs in medium #1306. Microscopic examination shows the cells to be cocci in singles, pairs, and clumps. Growth can be detected by the presence of turbidity in the broth. To detect early growth the culture may have to be examined microscopically.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While
