Description

Designation: NCTC 1621 [ATCC 25729, NRRL B-16538]

Deposited Name: *Corynebacterium equi* Magnusson

Product Description: Type strain. Avirulent; lacks virulence-associated proteins and plasmid. Used in CAMP test for *Listeria monocytogenes*.

Propagation

Medium

ATCC® Medium 44: Brain Heart Infusion Agar/Broth

Growth Conditions

Temperature: 37°C

Atmosphere: Aerobic

Propagation Procedure

1. Open vial according to enclosed instructions.
2. Using a single tube of #44 broth (5 to 6 mL), withdraw approximately 0.5 to 1.0 mL with a Pasteur or 1.0 mL pipette. Rehydrate the entire pellet.
3. Aseptically transfer this aliquot back into the broth tube. Mix well.
4. Use several drops of the suspension to inoculate a #44 agar slant, an agar plate or an additional broth tube if desired.
5. Incubate the tubes and plate at 37°C for 24 hours.

Notes

Two colony types are observed on #44 agar, 1) mucoid, entire, opaque, glistening, and flat; and, 2) mucoid, entire, glistening, opaque, and convex. Both colony types become orange with extended incubation. Biochemical reactions can vary depending upon the method used to test for them. This strain has demonstrated a positive urease reaction when tested using ATCC urease agar (#5286). The urease reaction was negative when tested on the API Coryne strip.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While
