# pRS306 phagemid in *E. coli* (ATCC® 77141™)

### Please read this FIRST

Storage Temp.  
**Store unopened frozen vial at -80°C or lower.**

---

Biosafety Level  
**1**

### Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

### Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: pRS306 phagemid in *E. coli* (ATCC® 77141™)

### Shipping Information

Glycerol stock of *E. coli* containing the plasmid

## Description

One of a series of pBluescript-based integrating vectors (ATCC 77138-77141) differing in the yeast selectable marker gene. This is a YI-type (integrating shuttle vector) permitting visual detection of recombinants and production of ssDNA in *E. coli*. It contains promoters for invitro RNA synthesis, priming sites useful for sequencing, and encodes the lacZ alpha (lacZ) peptide. The pRSS56, base vector was constructed by ligating a PvuI fragment (bp 498-2412) of pBluescript KS+ to a PvuI fragment (bp 2850-730) of pBS(+). It contains the KS MCS from pBluescript KS+ and the unique NdeI and AatII sites between bla and the f1 origin of pBS(+). A fragment (1.112 kb) containing the URA3 gene was inserted into the NdeI site of pRSS56. All ends were blunted. The order of the major features in this plasmid is: URA3 f1 ori (NaeI) T7 promoter lacZ/MCS T3 promoter pMB1 ori bla. - Genetics 122: 19-27, 1989.

**Designation:** pRS306 phagemid in *E. coli*

### Media:

ATCC® Medium 1227: LB Medium (ATCC medium 1065) with 50 mcg/ml ampicillin

## Conditions

**Temperature:** 37.0°C

## Vector Information

Size (kb): 4.381

Vector: pRS306 (phagemid)

Promoters: Promoter T3

Construction: pRSS56 [pBluescript KS+, pBS(+)]

Marker(s): URA3, ampR

Construct size (kb): 4.381

Features: insert detection: lacZ'

marker(s): ampR, URA3

promoter: lac, T3, T7

replicon: pMB1, f1

## References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

## Notes

Restriction digests of the vector gave the following sizes (in kb): PstI 2.7, 1.65; PvuI 3.9, 0.4; EcoRI 4.4; HindIII 4.4.  
ATCC Staff

## Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

## Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has
