Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: RAS Genetic Alteration Cell Panel (ATCC® TCP-1031™)

Description

The RAS genetic alteration panel is composed of 10 select cell lines, derived from a variety of common human cancer types, all of which carry mutations or gene copy amplification within the RAS gene. The RAS status of each cell line has been sequenced and validated by ATCC.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers
