

Product Sheet

Chlamydomphila pneumoniae (ATCC® VR-1310™)

Please read this **FIRST**

Storage Temp.
Vapor phase of liquid nitrogen

Biosafety Level
2

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Chlamydomphila pneumoniae* (ATCC® VR-1310™)

Description

Strain: CWL-029

Classification: *Chlamydiaceae*, *Chlamydomphila*

Original Source: Throat swab of pneumonia patient

Depositor: RC Barnes, Centers for Disease Control and Prevention

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:

HEp-2 cells (ATCC® CCL-23™)

Effect on Host:

Intracellular inclusion bodies visualized by fluorescent staining

Medium:

Special Maintenance Medium (SMM): DMEM (ATCC® 30-2002™) + 10% FBS (ATCC® 30-2020™) + 10 mM HEPES (Gibco 15630) + 2 µg/mL Cycloheximide (SIGMA C4859)

Growth Conditions

Temperature: 35°C

Recommendations for Infection: For best results, infection should be performed on an 80-100% confluent, 24-48 hour old cellular monolayer. Sonicate seed material for 20 seconds at approximately 240W to disrupt cells. Prepare dilution of chlamydia in minimum amount of volume (e.g. 1 mL per 25 cm²). Remove cell growth medium and inoculate with disrupted material. For adsorption, centrifuge at 1500 x g at 25°C for 1 hour. End adsorption by adding agent growth medium.

Incubation: Incubate infected culture for 72 hours at 35°C in a humidified 5% CO₂ atmosphere.

Preservation: Controlled-rate freezing.

References

References and other information relating to this product are available online at www.atcc.org.

Key Abbreviations

DMEM, Dulbecco's Modified Eagles' Medium (ATCC® 30-2002™)

FBS, Fetal bovine serum

g, acceleration due to gravity

HEPES, N-(2-Hydroxyethyl)piperazine-N'-(2-ethanesulfonic acid)

HEp-2, HeLa contaminant, human

SMM, Special maintenance medium

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.
