Description

Strain: DRL-62
Classification: Picornavirus, Enterovirus, Animal
Original Source:
Duckling liver
Depositor: P Woolcock

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:
duckling; duck embryo; chick embryo

Effect on Host:
Yes, in vivo effects: Duckling death, enlarged liver with hemorrhages
Duckling death, enlarged liver with punctuate and ecchymotic hemorrhages

Growth Conditions
Incubation: 1-3 days, *in vivo*

Comments

Material is preparation of duckling liver homogenate suspended in PBS, penicillin, and streptomycin. GenBank: DQ219396.1

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has
