Description

Strain: Be An 47693

Classification: Bunyaviridae, Phlebovirus

Common Name: Bujaru virus

Original Source:

Proechimys guyannensis oris., asymptomatic serum, Brazil, 1962

Depositor: Yale Arbovirus Research Unit

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:

suckling mouse, i.c. inoculation or i.p. inoculation

Effect on Host:

Causes death in host animal

Growth Conditions

Incubation: 7-8 days

Comments

HA produced (Opt. pH 6.4, 37°C). Related to Phlebotomus Fever Group by HAI, CF test specific.

References

References and other information relating to this product are available online at www.atcc.org.

Key Abbreviations

BSA, bovine serum albumin
CE, chicken embryo
CF, complement fixation
HA, hemagglutination
HAI, hemagglutination inhibition
LD[50], median lethal dose
i.c., intracerebral
i.p., intraperitoneal
PBS, phosphate buffered saline
PHS, Public Health Service
sM, suckling mouse
sMb, suckling mouse brain
TC, tissue culture
USDA, United States Department of Agriculture

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium
