

ATCC medium: 2232 YM medium with biotin 30 mcg/L and thiamine 600 mcg/L

Prepare Yeast Mold Agar (BD 271210) or Yeast Mold Broth (BD 271120) according to manufacturer's instructions.

To sterile medium, add sufficient quantities of filter-sterilized biotin and thiamine HCl solutions to achieve final concentrations of 30 mcg/L and 600 mcg/L, respectively.
