

ATCC medium: 230 Antibiotic medium #1 with 20 mcg per ml of tetracycline, streptomycin, and chloramphenicol

Prepare Antibiotic Medium 1 (Penassay Seed Agar) (BD 226340) according to manufacturer's instructions. Cool medium to 50-55C. Aseptically add filter-sterilized solutions of tetracycline, streptomycin, and chloramphenicol* to achieve a final concentration of 20 mcg/ml for each antibiotic.

*Chloramphenicol is soluble in ethanol.
