## CLOSTRIDIOIDES DIFFICILE PANEL

The ATCC *Clostridioides difficile* Panel (ATCC® MP-4™) comprises 8 clinical isolates representing each one of the known *C. difficile* toxinotypes including types 0, IIIb, IIIc, (tcdA-, tcdB-), V, VIII, XII, XXII. This unique collection is useful for building and testing new methods to detect *C. difficile*, the most common cause of nosocomial diarrhea worldwide.
