GROW WITH CONFIDENCE: THE MEDIA BEHIND OUR LEADING CELL LINES

Grow your cells like the pros and simplify your workflow by using the media trusted to cultivate ATCC's cell lines. These high-performance products are expertly designed to support the recovery, expansion, cryopreservation, and distribution of ATCC cell lines, virtually guaranteeing successful cell culture every time you thaw a frozen vial of cells. Tested and optimized, ATCC high-performance media and sera are used to produce and distribute our 4,000+ cell lines.

By using ATCC high performance media you will:

- Achieve robust, continuous cell growth
- Minimize cell loss when reviving from cryopreservation
- Reduce variability and enhance reproducibility
- Simplify your workflow with tested and optimized formulations

Explore the table below to see which classical media formulations we use for our most popular oncology cell lines (and many others). Start growing with confidence—choose ATCC media today!
