MicroQuant™ by ATCC

Precision in every pellet, trust in every test

MicroQuant™ is ATCC's new product line of precisely quantitated microbial reference materials designed to streamline microbial quality control testing in pharmaceutical manufacturing. These best-in-class controls are provided as stable, rapidly rehydrating pellets that deliver consistent quantitation and accurate, reproducible results—addressing the key challenges faced by microbial testing laboratories.

- Precisely quantitated in high-titer (10^7 to 10^8 CFU per vial) and low-titer (100 to 1,000 CFU per vial; 10 assays) formats to meet USP General Chapter requirements
- Ready-to-use format enables fast assay setup and reduces the need for special handling
- Immediate rehydration at room temperature to reduce hands-on time
- Stable in refrigerator temperatures for 6-12 months for easy storage (a freezer is not needed)
- Manufactured by ATCC under ISO 17034, and provided at passage 0
- Use of ATCC's MicroQuant™ products are subjected to a limited label license and the ATCC Material Transfer Agreement

The MicroQuant™ Workflow

MicroQuant™ controls enable you to streamline your workflow from days to minutes, allowing you to perform accurate and reproducible microbial quality control testing in a fraction of the time.
