

***Novispirillum itersonii* subsp. *itersonii* (Giesberger) Yoon et al.**

12639™

Description

Strain designation: Giesberger [CIP 105798, NCIMB 9070, NRRL B-2053]

Deposited As: *Spirillum itersonii* Giesberger

Type strain: Yes

Storage Conditions

Product format: Frozen

Intended Use

This product is intended for laboratory research use only. It is not intended for any animal or human therapeutic use, any human or animal consumption, or any diagnostic use.

BSL 1

ATCC determines the biosafety level of a material based on our risk assessment as guided by the current edition of *Biosafety in Microbiological and Biomedical Laboratories (BMBL)*, U.S. Department of Health and Human Services. It is your responsibility to understand the hazards associated with the material per your organization's policies and procedures as well as any other applicable regulations as enforced by your local or national agencies.

***Novispirillum itersonii* subsp. *itersonii* (Giesberger) Yoon et al.**

12639

Product Sheet

ATCC highly recommends that appropriate personal protective equipment is always used when handling vials. For cultures that require storage in liquid nitrogen, it is important to note that some vials may leak when submersed in liquid nitrogen and will slowly fill with liquid nitrogen. Upon thawing, the conversion of the liquid nitrogen back to its gas phase may result in the vial exploding or blowing off its cap with dangerous force creating flying debris. Unless necessary, ATCC recommends that these cultures be stored in the vapor phase of liquid nitrogen rather than submersed in liquid nitrogen.

Certificate of Analysis

For batch-specific test results, refer to the applicable certificate of analysis that can be found at www.atcc.org.

Growth Conditions

Medium:

ATCC Medium 3: Nutrient agar or nutrient broth

Temperature: 26°C

Handling Procedures

- 1. Open vial according to enclosed instructions.**
- 2. Using a single tube of #3 broth (5 to 6 ml), withdraw approximately 0.5 to 1.0 ml with a Pasteur or 1.0 ml pipette. Rehydrate pellet.**
- 3. Aseptically transfer this aliquot back into the broth tube. Mix well.**
- 4. Incubate at 26°C for 48 hours with shaking.**

***Novispirillum itersonii* subsp. *itersonii* (Giesberger) Yoon et al.**

12639

5. After growth has been achieved, use several drops of the suspension to inoculate a second tube of broth, a slant, and/or plate.

Notes

Culture grows better in broth with aeration. Cells are spiral shaped and highly motile.

This strain displays two colony types after 48 hours incubation: a) 75% circular, smooth, entire, convex, glistening, translucent; and b) 25% irregular, flat, rough, and transparent. Colony type b is a variant that has lost the ability to form helical cells (see Bergeys Manual of Systematic Bacteriology, Vol. 1, 1984, pg. 73). Biochemical characterization and the fatty acid profile are identical for both types.

Material Citation

If use of this material results in a scientific publication, please cite the material in the following manner: *Novispirillum itersonii* subsp. *itersonii* (Giesberger) Yoon et al. (ATCC 12639)

website, and Certificate of Analysis. For living cultures, ATCC lists the media formulation and reagents that have been found to be effective for the product. While other unspecified media and reagents may also produce satisfactory results, a change in the ATCC and/or depositor-recommended protocols may affect the recovery, growth, and/or function of the product. If an alternative medium formulation or reagent is used, the ATCC warranty for viability is no longer valid. Except as expressly set forth herein, no other warranties of any kind are provided, express or implied, including, but not limited to, any implied warranties of merchantability, fitness for a particular purpose, manufacture according to cGMP standards, typicality, safety, accuracy, and/or noninfringement.

Disclaimers

This product is intended for laboratory research use only. It is not intended for any animal or human therapeutic use, any human or animal consumption, or any diagnostic use. Any proposed commercial use is prohibited without a [license from ATCC](#).

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate or complete and the customer bears the sole responsibility of confirming the accuracy and completeness of any such information.

This product is sent on the condition that the customer is responsible for and assumes all risk and responsibility in connection with the receipt, handling, storage, disposal, and use of the ATCC product including without limitation taking all appropriate safety and handling precautions to minimize health or environmental risk. As a condition of receiving the material, the customer agrees that any activity undertaken with the ATCC product and any progeny or modifications will be conducted in compliance with all applicable laws, regulations, and guidelines. This product is provided 'AS IS' with no representations or warranties whatsoever except as expressly set forth herein and in no event shall ATCC, its parents, subsidiaries, directors, officers, agents, employees, assigns, successors, and affiliates be liable for
