

# ***Methylosinus sporium* (ex Romanovskaya et al.) Bowman et al.**

**35069™**

## **Description**

**Strain designation:** NCIB 11126 [5, ACM 3306, IMET 10545]

**Deposited As:** *Methylosinus sporium* (ex Romanovskaya et al.) Bowman et al.

**Type strain:** Yes

---

## **Storage Conditions**

**Product format:** Freeze-dried

---

## **Intended Use**

This product is intended for laboratory research use only. It is not intended for any animal or human therapeutic use, any human or animal consumption, or any diagnostic use.

---

## **BSL 1**

ATCC determines the biosafety level of a material based on our risk assessment as guided by the current edition of *Biosafety in Microbiological and Biomedical Laboratories (BMBL)*, U.S. Department of Health and Human Services. It is your responsibility to understand the hazards associated with the material per your organization's policies and procedures as well as any other applicable regulations as enforced by your local or national agencies.

Product Sheet

ATCC highly recommends that appropriate personal protective equipment is always used when handling vials. For cultures that require storage in liquid nitrogen, it is important to note that some vials may leak when submersed in liquid nitrogen and will slowly fill with liquid nitrogen. Upon thawing, the conversion of the liquid nitrogen back to its gas phase may result in the vial exploding or blowing off its cap with dangerous force creating flying debris. Unless necessary, ATCC recommends that these cultures be stored in the vapor phase of liquid nitrogen rather than submersed in liquid nitrogen.

---

## **Certificate of Analysis**

For batch-specific test results, refer to the applicable certificate of analysis that can be found at [www.atcc.org](http://www.atcc.org).

---

## **Growth Conditions**

### **Medium:**

ATCC Medium 1306: Nitrate mineral salts medium (NMS)

**Temperature:** 30°C

**Atmosphere:** 50% CH<sub>4</sub>, 50% Air

---

## **Handling Procedures**

1. Open vial according to enclosed instructions.
2. Using a single tube of broth, aseptically transfer 0.5 mL to the vial and rehydrate the entire pellet.
3. Aseptically transfer this aliquot back to the broth tube and mix well. Transfer 0.1 mL to slants. Plate the rehydrated culture (0.1 mL) onto non-selective medium (to

test for purity). When using ATCC Medium #1306 use a gas mixture of 50% methane and 50% air. With ATCC Medium #784 no special gas is required.

4. Incubate the culture at 30°C for 48 to 72 hours. When using ATCC Medium #1306 the culture needs to be fed a mixture of 50% methane and 50% air every 24 hours for best results.

5. Growth should be detected within 3 to 5 days. No growth should be detected on the non-selective plates.

---

### **Notes**

Microscopic examination shows the cells to be motile slightly curved rods, single and pairs. There is no growth on medium #260 aerobically or anaerobically.

---

### **Material Citation**

If use of this material results in a scientific publication, please cite the material in the following manner: *Methylosinus sporium* (ex Romanovskaya et al.) Bowman et al. (ATCC 35069)

---

### **References**

References and other information relating to this material are available at [www.atcc.org](http://www.atcc.org).

---

### **Warranty**

The product is provided 'AS IS' and the viability of ATCC® products is warranted for 30 days from the date of shipment, provided that the customer has stored and handled the product according to the information included on the product information sheet,

website, and Certificate of Analysis. For living cultures, ATCC lists the media formulation and reagents that have been found to be effective for the product. While other unspecified media and reagents may also produce satisfactory results, a change in the ATCC and/or depositor-recommended protocols may affect the recovery, growth, and/or function of the product. If an alternative medium formulation or reagent is used, the ATCC warranty for viability is no longer valid. Except as expressly set forth herein, no other warranties of any kind are provided, express or implied, including, but not limited to, any implied warranties of merchantability, fitness for a particular purpose, manufacture according to cGMP standards, typicality, safety, accuracy, and/or noninfringement.
