

HTLV-II, deltaH6H11, in pBR322, purified plasmid DNA

45134D™

Description

Full length clone of Human T-cell leukemia virus II.

Constructed by inserting the HindIII fragment from lambdaH6 into the HindIII site of pBR322 that had been modified by an EcoRV-MscI deletion of approximately 1.25 kb.

The full-length plasmid is unstable in bacterial hosts, and is distributed as purified plasmid DNA. The insert contains the following restriction sites (approximate kb from 5' end): EcoRI--0.1, 0.8, 4.7, 9.0; KpnI--1.7, 3.4; NheI--1.0, 6.65; SacI--0.5, 4.0, 8.7; XbaI--3.6; BamHI--0.3, 5.0, 8.4.

- personal communication

The viral portion of the insert is 8.8 kb. The insert also includes cellular sequences derived from Mo (T cell leukemia) cells.

- Nature 305: 502-505, 1983

Size of Construct (kb): 13.2

Organism: human T-cell leukemia virus II

Clone type: Clone

Shipping information: Plasmid DNA

Storage Conditions

Product format: Freeze-dried

Storage conditions: 2°C to 8°C

HTLV-II, deltaH6H11, in pBR322, purified plasmid DNA

45134D

Intended Use

This product is intended for laboratory research use only. It is not intended for any animal or human therapeutic use, any human or animal consumption, or any diagnostic use.

BSL 2

ATCC determines the biosafety level of a material based on our risk assessment as guided by the current edition of *Biosafety in Microbiological and Biomedical Laboratories (BMBL)*, U.S. Department of Health and Human Services. It is your responsibility to understand the hazards associated with the material per your organization's policies and procedures as well as any other applicable regulations as enforced by your local or national agencies.

Certificate of Analysis

For batch-specific test results, refer to the applicable certificate of analysis that can be found at www.atcc.org.

Insert Information

Insert size (kb): 10.1

Type of DNA: genomic

Insert information:

Insert ends: HindIII

DNA Seq. Acc.: M10060

Genome: human T-cell leukemia virus II

Contains complete coding sequence: Yes

Insert end: HindIII

HTLV-II, deltaH6H11, in pBR322, purified plasmid DNA

45134D

Vector Information

Intact vector size: 4.363

Vector name: pBR322

Type of vector: plasmid

Vector end: HindIII

Vector information: DNA Seq. Acc.: J01749

Markers: ampR; tetR

Replicon: pMB1

Handling Procedures

Plasmid can be rehydrated with water or TE buffer. Plasmid can be transformed into a suitable *Escherichia coli* host using standard protocols. Transformed bacteria can be grown on LB + 50 µg/mL of ampicillin agar. Incubate cultures at 30°C. Isolate DNA using standard plasmid preparation procedures.

Material Citation

If use of this material results in a scientific publication, please cite the material in the following manner: HTLV-II, deltaH6H11, in pBR322, purified plasmid DNA (ATCC 45134D)

Warranty

The product is provided 'AS IS' and the viability of ATCC® products is warranted for 30 days from the date of shipment, provided that the customer has stored and handled

the product according to the information included on the product information sheet, website, and Certificate of Analysis. For living cultures, ATCC lists the media formulation and reagents that have been found to be effective for the product. While other unspecified media and reagents may also produce satisfactory results, a change in the ATCC and/or depositor-recommended protocols may affect the recovery, growth, and/or function of the product. If an alternative medium formulation or reagent is used, the ATCC warranty for viability is no longer valid. Except as expressly set forth herein, no other warranties of any kind are provided, express or implied, including, but not limited to, any implied warranties of merchantability, fitness for a particular purpose, manufacture according to cGMP standards, typicality, safety, accuracy, and/or noninfringement.

Disclaimers

This product is intended for laboratory research use only. It is not intended for any animal or human therapeutic use, any human or animal consumption, or any diagnostic use. Any proposed commercial use is prohibited without a license from ATCC.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate or complete and the customer bears the sole responsibility of confirming the accuracy and completeness of any such information.

This product is sent on the condition that the customer is responsible for and assumes all risk and responsibility in connection with the receipt, handling, storage, disposal, and use of the ATCC product including without limitation taking all appropriate safety and handling precautions to minimize health or environmental risk. As a condition of receiving the material, the customer agrees that any activity undertaken with the ATCC product and any progeny or modifications will be conducted in compliance with all applicable laws, regulations, and guidelines. This product is provided 'AS IS' with no representations or warranties whatsoever except as expressly set forth herein and in no event shall ATCC, its parents, subsidiaries,
