

Monoclonal antibody against FOS peptide (359-378) [LA 054]

VR-1518AF-MAB™

Description

Immunization Schedule: Approximately 70 g of coupled peptide in 300 l of a 1:1 mixture of phosphate buffered saline pH 7.4 and complete Freund's adjuvant administered intraperitoneally on day 0; followed by an equal amount of conjugate in 300 l of a 1:1 mixture of phosphate buffered saline pH 7.4 and 10 mg/mL alum administered intraperitoneally on day 14; followed by 70 g of coupled peptide in 200 l of phosphate buffered saline pH 7.4 administered intravenously on day 51. The spleen was removed on day 56.

Antibody class: IgG1

Storage Conditions

Product format: Freeze-dried

Storage conditions: 2°C to 8°C

Intended Use

This product is intended for laboratory research use only. It is not intended for any animal or human therapeutic use, any human or animal consumption, or any diagnostic use.

BSL 1

ATCC determines the biosafety level of a material based on our risk assessment as

Monoclonal antibody against FOS peptide (359-378) [LA 054]

VR-1518AF-MAB

guided by the current edition of *Biosafety in Microbiological and Biomedical Laboratories (BMBL)*, U.S. Department of Health and Human Services. It is your responsibility to understand the hazards associated with the material per your organization's policies and procedures as well as any other applicable regulations as enforced by your local or national agencies.

Certificate of Analysis

For batch-specific test results, refer to the applicable certificate of analysis that can be found at www.atcc.org.

Product Information

Immunogen species: Synthetic peptide RKGSSSNEPSSDSLSSPTLL(C) (residues 359-378 of the FOS sequence) coupled to keyhole limpet hemocyanin

Animal: Male 129GIX+ mice were used for immunization.

Adjuvant: complete Freund's adjuvant

Material development:

Source and Sex of Animals: Male 129GIX+ mice were used for immunization.

Fusion Partners: 1.3×10^8 nucleated spleen cells with 2×10^7 SP2/0 non-secreting myeloma cells

Immunization Schedule: Approximately 70 mg of coupled peptide in 300 ml of a 1:1 mixture of phosphate buffered saline pH 7.4 and complete Freund's adjuvant administered intraperitoneally on day 0;

followed by an equal amount of conjugate in 300 ml of a 1:1 mixture of phosphate buffered saline pH 7.4 and 10 mg/ml alum administered intraperitoneally on day 14; followed by 70 mg of coupled peptide in 200 ml of phosphate buffered saline pH 7.4 administered intravenously on day 51. The spleen was removed on day 56.

Cross-reactivity: In immunoblot screening a protein of approximately 55 kd is detected in a fibroblast cell line transformed by fes, sis, and scr.

Warranty

The product is provided 'AS IS' and the viability of ATCC® products is warranted for 30 days from the date of shipment, provided that the customer has stored and handled the product according to the information included on the product information sheet, website, and Certificate of Analysis. For living cultures, ATCC lists the media formulation and reagents that have been found to be effective for the product. While other unspecified media and reagents may also produce satisfactory results, a change in the ATCC and/or depositor-recommended protocols may affect the recovery, growth, and/or function of the product. If an alternative medium formulation or reagent is used, the ATCC warranty for viability is no longer valid. Except as expressly set forth herein, no other warranties of any kind are provided, express or implied, including, but not limited to, any implied warranties of merchantability, fitness for a particular purpose, manufacture according to cGMP standards, typicality, safety, accuracy, and/or noninfringement.

Disclaimers
