

# Human adenovirus 34

VR-716™

## Description

**Strain designation:** Compton

**Deposited As:** Adenovirus type 34

---

## Storage Conditions

**Product format:** Frozen

**Storage conditions:** -70°C or colder

---

## Intended Use

This product is intended for laboratory research use only. It is not intended for any animal or human therapeutic use, any human or animal consumption, or any diagnostic use.

---

## BSL 2

ATCC determines the biosafety level of a material based on our risk assessment as guided by the current edition of *Biosafety in Microbiological and Biomedical Laboratories (BMBL)*, U.S. Department of Health and Human Services. It is your responsibility to understand the hazards associated with the material per your organization's policies and procedures as well as any other applicable regulations as enforced by your local or national agencies.

ATCC highly recommends that appropriate personal protective equipment is always used when handling vials. For cultures that require storage in liquid nitrogen, it is important to note that some vials may leak when submersed in liquid nitrogen and

## Human adenovirus 34

VR-716

will slowly fill with liquid nitrogen. Upon thawing, the conversion of the liquid nitrogen back to its gas phase may result in the vial exploding or blowing off its cap with dangerous force creating flying debris. Unless necessary, ATCC recommends that these cultures be stored in the vapor phase of liquid nitrogen rather than submersed in liquid nitrogen.

---

### Certificate of Analysis

For batch-specific test results, refer to the applicable certificate of analysis that can be found at [www.atcc.org](http://www.atcc.org).

---

### Growth Conditions

**Host:** HEp-2 (ATCC CCL-23)

Host Range: WI-38 (ATCC CCL-75), HELF, RU-1, Pr HAm, Pr HEK, KB (ATCC CCL-17), HEp-2 (ATCC CCL-23)

**Effects:** cell sloughing; cell detachment; cell clumping; refractile cell rounding

**Complete medium:** EMEM +10% FBS

**Temperature:** 35°C

**Recommendations for infection:**

1. Seed cells at  $3.0\text{-}5.0 \times 10^4$  cells/cm<sup>2</sup> to achieve 70-80% confluence at time of infection (1 – 2 days after seeding)
2. Rinse cells with 1X DPBS or Neat EMEM
3. Agent should be diluted using Neat EMEM with a virus MOI of 0.014
4. Adsorption is at 37°C, 50% CO<sub>2</sub>, humidity for 1 – 2 hours. Vessels should be stationary
5. AGM is EMEM + 2% FBS
6. Recommended incubation time is 2 – 4 days.
7. Harvest once vessels at 80 – 90% CPE presentation.

**Incubation:** 3 days

---

# Human adenovirus 34

VR-716

## Handling Procedures

**Mycoplasma contamination:** Not detected

---

## Notes

This virus has been placed in Rosens HA group 1, subgroup 1a. No HAI or SN cross with types 1 through 33; high HAI cross between AV-34 virus and AV-35 sera; moderate HAI cross between AV-35 virus and AV-34 sera. The adenovirion, with typical morphology and CF and HA activities, has a buoyant density of 1.340 g/mL; average diameter, excluding projections is 73 nm. Partially heat labile at pH 7.0 with or without 1 M MgCl<sub>2</sub>.

**Key Abbreviations:** °C, Degrees Celsius; CO<sub>2</sub>, Carbon dioxide; EMEM, Eagle's Minimum Essential Medium; FBS, Fetal bovine serum; MOI, Multiplicity of infection

---

## Material Citation

If use of this material results in a scientific publication, please cite the material in the following manner: Human adenovirus 34 (ATCC VR-716)

## Warranty

The product is provided 'AS IS' and the viability of ATCC® products is warranted for 30 days from the date of shipment, provided that the customer has stored and handled the product according to the information included on the product information sheet, website, and Certificate of Analysis. For living cultures, ATCC lists the media

## Human adenovirus 34

VR-716

formulation and reagents that have been found to be effective for the product. While other unspecified media and reagents may also produce satisfactory results, a change in the ATCC and/or depositor-recommended protocols may affect the recovery, growth, and/or function of the product. If an alternative medium formulation or reagent is used, the ATCC warranty for viability is no longer valid. Except as expressly set forth herein, no other warranties of any kind are provided, express or implied, including, but not limited to, any implied warranties of merchantability, fitness for a particular purpose, manufacture according to cGMP standards, typicality, safety, accuracy, and/or noninfringement.

### Disclaimers

This product is intended for laboratory research use only. It is not intended for any animal or human therapeutic use, any human or animal consumption, or any diagnostic use. Any proposed commercial use is prohibited without a [license from ATCC](#).

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate or complete and the customer bears the sole responsibility of confirming the accuracy and completeness of any such information.

This product is sent on the condition that the customer is responsible for and assumes all risk and responsibility in connection with the receipt, handling, storage, disposal, and use of the ATCC product including without limitation taking all appropriate safety and handling precautions to minimize health or environmental risk. As a condition of receiving the material, the customer agrees that any activity undertaken with the ATCC product and any progeny or modifications will be conducted in compliance with all applicable laws, regulations, and guidelines. This product is provided 'AS IS' with no representations or warranties whatsoever except as expressly set forth herein and in no event shall ATCC, its parents, subsidiaries, directors, officers, agents, employees, assigns, successors, and affiliates be liable for indirect, special, incidental, or consequential damages of any kind in connection with
