ATCC Medium: 2174 Brain Heart Infusion Medium w/ 4mcg/ml Vancomycin

**Base Medium**
BHI Broth (BD 237500) .......................... 37.0 g
DI Water ........................................... 950 ml

Autoclave at 121°C.

Once base has cooled to 50°C, aseptically add the following:

**Vancomycin Solution**
Vancomycin .................................... 0.004 g
DI Water .......................................... 50 ml

*If the reagent antibiotic powder indicates an assay value of potency, use that value to correctly calculate the amount of powder needed.

Filter sterilize.

*To make agar medium replace BHI Broth with 52 grams of BHI Agar (BD 211065)
