Description

Designation: NRRL B-2309
Deposited Name: *Bacillus popilliae* Dutky
Product Description: Type strain

Propagation

Medium

ATCC® Medium 20: J B medium with 0.2% glucose
ATCC® Medium 260: Trypticase soy agar/broth with defibrinated sheep blood

Growth Conditions

Temperature: 26°C
Atmosphere: Aerobic

Propagation Procedure

1. Open vial according to enclosed instructions.
2. Using a single tube of #20 or #260 broth (5 to 6 mL), withdraw approximately 0.5 to 1.0 mL with a Pasteur or 1.0 mL pipette. Rehydrate the entire pellet.
3. Aseptically transfer this aliquot back into the broth tube. Mix well. **Make additional broth passages since the cryoprotectant may inhibit the growth of the organism in the primary tube.**
4. Use several drops of the suspension to inoculate a FRESH #260 agar slant and/or plate. Plates must be less than a week old and moist. A biphasic slant works best.
5. Incubate tubes at 26°C for two to three days without shaking. Plates should show growth in three to five days. After growth is achieved, the organism must be preserved or transferred every four days to insure continued viability.

Notes

Colonies on #260 plates are irregular, undulate, dull, flat, smooth, and small.

It is important to use fresh media.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.
