

Product Sheet

Bifidobacterium longum *subsp. infantis* (ATCC® 15697™)

Please read this **FIRST**

Storage Temp.
Frozen: -80°C or colder
Freeze-Dried: 2°C to 8°C
Live Culture: See Propagation Section

Biosafety Level
1

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Bifidobacterium longum subsp. infantis* (ATCC® 15697™)

Description

Designation: S12
Deposited Name: *Bifidobacterium infantis* Reuter
Product Description: Type strain

Propagation

Medium
ATCC® Medium 2107: Modified Reinforced Clostridial Agar/Broth Medium (pre-reduced)

Growth Conditions

Temperature: 37°C
Atmosphere: Anaerobic gas mixture, 80% N₂- 10% CO₂- 10% H₂ or 100% N₂

Propagation Procedure

1. Open vial according to enclosed instructions.
2. Under anaerobic conditions, withdraw 0.5 mL of #2107 from a single test tube (5 to 6 mL) and rehydrate the vial contents.
3. Aseptically transfer this aliquot back into the broth tube. Additional tubes may be inoculated with 0.5 mL each from the suspension. Streak several blood plates to check for colonial morphology and purity.
4. Incubate tubes under an anaerobic atmosphere at 37°C. Incubate one agar plate anaerobically for colony formation, and one aerobically for aerobic contamination check.
5. After 2-3 days, growth should be evident by good turbidity and sediment in the broth and colonies on the agar plate. The aerobic plate may have a thin film in the area of heaviest inoculation, however, it should show no other signs of aerobic contamination.

ANAEROBIC CONDITIONS:

Anaerobic conditions for transfer may be obtained by either of the following:

- Use of an anaerobic gas chamber, or
- Placement of test tubes under a gassing cannula system hooked to anaerobic gas.

Anaerobic conditions for incubation may be obtained by any of the following:

- Loose screw caps on test tubes in anaerobic chamber,
- Loose screw caps on test tubes in an activated anaerobic gas pack jar, or
- Use of sterile butyl rubber stoppers on test tubes so that an anaerobic gas headspace is retained.

Notes

ATCC recommends Anaerobe Systems Brucella Blood Plates (AS-111 or AS-141). Colonies on Brucella Blood agar may appear entire, smooth, convex, glistening, and white.

Purified genomic DNA of this strain is available as ATCC® 15697D-5™.

Several GenBank accessions are available for this item:

1. Nucleotide (GenBank) : AF261679 *Bifidobacterium infantis* strain ATCC 15697 L-lactate dehydrogenase gene, partial cds.
2. Nucleotide (GenBank) : CP001095 *Bifidobacterium longum subsp. infantis* ATCC 15697, complete genome.
3. Nucleotide (GenBank) : M84783 *Bifidobacterium infantis* (ATCC 15697) 16S ribosomal RNA gene, partial.
4. Nucleotide (GenBank) : U09792 *Bifidobacterium infantis* ATCC 15697 16S-23S intergenic spacer, partial sequence.
5. Nucleotide (GenBank) : U50269 *Bifidobacterium infantis* RecA gene, partial cds.
6. Nucleotide (GenBank) : X70974 *B. infantis* (CIP 6469) DNA sequence for 16S rRNA.
7. Nucleotide (GenBank) : X89111 *Bifidobacterium* sp. 16S and 23S rRNA genes and ITS.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Bifidobacterium longum subsp. infantis* (ATCC® 15697™)

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of materials on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of such materials.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at www.atcc.org
