## Description

**Deposited Name:** *Nitrosomonas europaea* Winogradsky

**Product Description:** Genome sequencing strain. Depositor states that this strain produces hydroxylamine oxidase [hydroxylamine oxidoreductase].

## Propagation

### Medium

ATCC® Medium 2265: *Nitrosomonas europaea* medium

### Growth Conditions

**Temperature:** 26°C

**Atmosphere:** Aerobic

### Propagation Procedure

1. Open thawed vial according to enclosed instructions or visit [www.atcc.org](http://www.atcc.org) for instructions.
2. Thaw the frozen vial quickly by immersing in a 37°C water bath and gently swirling until the ice melts, then aseptically transfer the vial contents to 10 mL of ATCC broth #2265 contained in an Erlenmeyer flask or a tissue culture flask.
3. Incubate the flask in a shaking incubator at approximately 200 rpm at 26°C. Ensure that the flask is being incubated in the dark by covering with foil.
4. Growth should be evident within 3-5 days, appearing as a cloudy turbidity within the broth or a positive nitrite test.

## Notes

Media ATCC #2265 is light sensitive and degrades after prolonged exposure to light, approximately 3 months. Cover media in foil to extend the shelf life. After 3 months new media should be prepared to ensure the best viability of the organism. Transfer the culture every 1-3 weeks, storing the fully grown culture at 4°C. A 10% inoculum (10 mL per 100 mL fresh medium) is recommended. This strain is very sensitive to impurities on glassware.

Additional information on this culture is available on the ATCC® web site at [www.atcc.org](http://www.atcc.org).

## References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

## Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

## Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC
