

Product Sheet

Thiobacillus denitrificans (ATCC® 23642™)

Please read this **FIRST**

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Thiobacillus denitrificans* (ATCC® 23642™)

Description

Designation: 4G [NCIB 9546]

Deposited Name: *Thiobacillus denitrificans* Kelly and Harrison

Propagation

Medium

ATCC® Medium 295: S-8 medium for Thiobacillus

Growth Conditions

Temperature: 30.0°C

Atmosphere: Anaerobic

Propagation Procedure

1. Open vial according to enclosed instructions.
2. Using a single tube of #295 broth (5 to 6 ml), withdraw approximately 0.5 to 1.0 ml with a Pasteur or 1.0 ml pipette. Rehydrate the entire pellet.
3. Aseptically transfer this aliquot back into the broth tube. Mix well. Transfer 0.5 ml of the suspension into a second tube of broth.
4. Place tubes with caps loosened in an anaerobe jar or other acceptable method for obtaining anaerobic conditions. Incubate at 30°C.
5. Broth becomes cloudy, indicating growth, after approximately 7 days of incubation. Agar slants and plates may now be inoculated with 0.2 ml each from the 7 day broth culture. Additional volumes of broth can be inoculated using a 5% inoculum (i.e. 5 ml to 100 ml fresh broth).

Notes

Better growth may be achieved on initial rehydration in the second tube. The cryoprotectant used in the freeze-drying process may inhibit growth in the primary tube.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.
