

## Nucleic Acid Product Sheet (ATCC® 2601D™)

Please read this FIRST

### Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

### Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: (ATCC® 2601D™)

### Nucleic Acid Information

#### DNA INFORMATION:

Amount: 25 ug (twenty-five micrograms) **dried**  
(in lot 344494)

### Description

**Source:** *Saccharomyces cerevisiae* Meyen ex E.C. Hansen

**Designation:** genomic DNA from NRRL Y-53 (ATCC 2601)

**Description:**

#### DESCRIPTION:

High molecular weight DNA is appropriate for polymerase chain reaction (PCR)\* process and other molecular biology applications.

### Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

### Quality Control Information

#### QUALITY CONTROL INFORMATION:

1. DNA samples have been aseptically air-dried and are shipped at ambient temperature. Store at 4 °C upon receipt to prevent degradation.
2. Integrity of DNA and presence of RNA contamination is determined by visualization on 1.0% agarose gels post-stained with ethidium bromide.
3. DNA is tested for restrictability and/or enzymatic amplification. PCR amplified with primers ITS1 (5'TCCGCAGGTTACCTACGGA) and ITS4 (5'TCCTCCGCTTATTGATATGC) [White et al. 1990. PCR Protocols. San Diego: Academic Press].
4. Based on electrophoretic analysis on a 1% agarose LE gel alongside an EcoRI+HindIII lambda marker, the molecular weight was found to be >21 kilobase pairs.
5. No RNA is detectable by electrophoresis.
6. Rehydration may be accomplished to the level of 100-250 ug/ml using TE buffer (containing 10 mM TRIS and 1 mM EDTA, pH 7.5).

\* The polymerase chain reaction (PCR) process is covered by patents owned by Hoffmann-La Roche Inc. Use of the PCR process requires a license.

### Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

### ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

### Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.
