Designation: DM 122
Deposited Name: Staphylococcus hominis subsp. hominis Kloos and Schleifer
Product Description: Type strain

Medium
ATCC® Medium 18: Trypticase Soy Agar/Broth

Growth Conditions
Temperature: 37°C
Atmosphere: Aerobic

Propagation Procedure
1. Open vial according to enclosed instructions or visit www.atcc.org for instructions.
2. Rehydrate the entire pellet with approximately 0.5 mL of #18 broth. Aseptically transfer the entire contents to a 5-6 mL tube of #18 broth. Additional test tubes can be inoculated by transferring 0.5 mL of the primary broth tube to these secondary tubes.
3. Use several drops of the primary broth tube to inoculate a #18 plate and/or #18 agar slant.
4. Incubate at 37°C for 24 hours.

Notes
ATCC® Medium 3: Nutrient Agar/Broth can be used as an alternate growth media.
Additional information on this culture is available on the ATCC® web site at www.atcc.org.
