Description

Deposited Name: *Thiobacillus organoparus* Markosian

Propagation

Medium

ATCC® Medium 806: Thiobacillus heterotrophic medium

Growth Conditions

Temperature: 26.0°C

Propagation Procedure

1. Open vial according to enclosed instructions.
2. Withdraw 0.8 ml from a single tube (5 to 6 ml) of #806 broth with a Pasteur or 0.1 ml pipette. Rehydrate the pellet.
3. Aseptically transfer 0.5 ml back into the broth tube. Inoculate a slant tube with the remaining 0.3 ml. Additional broth tubes may be inoculated with 0.5 ml each from the initial broth tube.
4. After approximately 4 days of incubation, growth should be evident by turbidity in the broth tubes and turbidity in the broth at the base of the agar slant. It can take up to 14 days for good colony formation on agar. Cells are short motile rods occurring singly and in pairs. Cells are Gram negative.
5. After good growth is achieved in tubes, flasks of broth may be inoculated. A 5 to 10% inoculum is recommended per flask (5 to 10 ml per 100 ml media). Flasks should be incubated with shaking.

Notes

This culture does not readily form colonies on agar. Additional information on this culture is available on the ATCC web site at www.atcc.org.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of materials on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of such materials.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at www.atcc.org
