Description

Strain Designation: Malakal
Deposited Name: *Leishmania donovani* (Laveran and Mesnil) Ross
Depositor: RG Yaeger
Isolation:
human male, Malakal, Sudan, 1964

Propagation

Growth Conditions

Duration: in vivo, hamster
Protocol: ATCCNO: 30499 SPEC: This strain is distributed as a frozen stabulate. See general instructions for thawing and storage of frozen material before proceeding. Upon arrival remove the frozen ampoule from the dry ice and transfer directly to a 35C water bath. Inject the entire contents of the ampule intraperitoneally into a golden hamster at least 8 weeks old. Serial passage in golden hamster every 30-45 days. The spleen is homogenized in a balanced salt solution (salt solution for ATCC medium 811 is suitable), approximately 5.0 ml solution/spleen. Inoculate 0.3-0.5 ml of spleen homogenate/hamster. Dosage should be a minimum of $2 \times 10^{(6)}$ amastigotes/hamster. The course of infection will vary with the size of the inoculum.

Culture Maintenance

This culture is shipped in frozen hamster blood. Inject the entire contents of the ampule intraperitoneally into a golden hamster at least 8 weeks old. Serial passage in golden hamster every 30-45 days. The spleen is homogenized in a balanced salt solution (salt solution for ATCC medium 811 is suitable), approximately 5.0 ml solution/spleen. Inoculate 0.3-0.5 ml of spleen homogenate/hamster. Dosage should be a minimum of $2 \times 10^{(6)}$ amastigotes/hamster. The course of infection will vary with the size of the inoculum.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.
