Description

Designation: B31

Deposited Name: *Borrelia burgdorferi* Johnson et al. emend. Baranton et al.

Product Description: Type strain. Genome sequence strain. Absence of lipopolysaccharide. Causative agent of Lyme disease. Survival in experimentally infected human blood.

Propagation

Medium

ATCC® Medium 1914: Revised BSK medium

Growth Conditions

Temperature: 37°C

Atmosphere: Microaerophilic

Propagation Procedure

1. Thaw cryovial at room temperature and aseptically transfer the entire contents of the vial to a 10 mL tube of fresh #1914 broth. Mix well.
2. Transfer one-tenth of this cell suspension to two or three additional 10 mL tubes of fresh #1914 broth.
3. Incubate at 37°C. Microaerophilic conditions are needed to support proper growth, so the use of a CampyPak or similar microaerophilic atmosphere generator is recommended. Growth can be observed in an aerobic environment, but not as well as under microaerophilic conditions. Growth does not occur on agar.

Notes

Growth usually occurs after 5 to 7 days. Acid formation during growth will change the medium to a light or yellowish-orange color. Turbidity is not evident. Cells can be monitored under phase microscopy as long spiral rods, and their motility by the twitching movement.

Borrelia burgdorferi is a fragile, sensitive organism that must have the appropriate medium for growth. Rabbit serum is essential for the growth of this organism. Fresh medium enhances growth. Medium older than one month should not be used.

Purified genomic DNA of this strain is available as ATCC® 35210D-5™.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet,
