Description

Designation: M-112 [BO-6]
Deposited Name: *Neisseria meningitidis* (Albrecht and Ghon) Murray
Antigenic Properties: Serogroup Y

Propagation

Medium
ATCC® Medium 814: GC Agar/Broth Medium

Growth Conditions
Temperature: 37°C
Atmosphere: 5% CO₂

Propagation Procedure

1. Open vial according to enclosed instructions.
2. Using a single tube of #814 broth (5 to 6 mL), withdraw approximately 0.5 to 1.0 mL with a Pasteur or 1.0 mL pipette. Rehydrate the entire pellet.
3. Aseptically transfer this aliquot back into the broth tube. Mix well.
4. Use 0.2 mL of the suspension to inoculate a #814 slant, and/or 0.1 mL for a plate.
5. Incubate all tubes and plate at 37°C with 5% CO₂. Growth should occur in 24/48 hours. Assure that screw caps are loose during incubation period.

Notes

After 48 hours, growth is evident by entire, smooth, glistening, and low convex colonies on the agar surface. Brain Heart Infusion (BD 237500) can be used to rehydrate vial contents if #814 broth is not available, but it will not support growth as well as the GC broth. If a clear broth culture is desired, use HTM (Haemophilus Test Broth). To make HTM, a fresh hematin stock solution is prepared by dissolving 50 mg of hematin powder in 100 ml of 0.01 M NaOH with heat and stirring until the powder is dissolved thoroughly. Thirty milliliters of the hematin stock solution is added to 1.0 L of Mueller Hinton Broth with 5g of yeast extract. After autoclaving and cooling, aseptically add 3 ml of a NAD (nicotinamide adenine dinucleotide) stock solution (50 mg of NAD dissolved in 10 ml of distilled water; filter sterilized). Additional information on this culture is available on the ATCC web site at www.atcc.org.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been
