## Description

**Designation:** 51 [CIP 103912]

**Deposited Name:** *Rhodobacter veldkampii* Hansen and Imhoff

**Product Description:** Type strain

## Propagation

### Medium

ATCC® Medium 1438: *Rhodobacter veldkampii* medium (ATCC medium 37) with 1 g/L sodium acetate

### Growth Conditions

**Temperature:** 26°C

**Atmosphere:** Anaerobic

### Propagation Procedure

1. Open vial according to enclosed instructions.
2. This organism can tolerate brief exposure to oxygen, so the vial may be opened without anaerobic conditions. Aseptically transfer 0.5 mL of medium #1438 to the vial and rehydrate the pellet. Transfer this suspension to a small screw cap test tube, then fill the tube to capacity with #1438 medium. Seal the tube with a screw cap and incubate at room temperature under a tungsten lamp.
3. After two to three days, growth should be evident indicated by turbidity and red brown pigmentation through out the broth. When examined microscopically, the cells appear as small rods, in singles and pairs. Once good growth has been obtained the culture should be transferred to fresh broth, using a 20% inoculum.

## Notes

ATCC medium #1438 may be stored separately as solution 1, solution 2/3, and solution 4. In a small screw cap tube, mix 5 mL of solution 1, 3 mL of solution 2/3, 0.2 mL of solution 4, 1 g/L sodium acetate, and reduce with 0.1 mL of a 10% thiosulfate solution. Place tubes in the dark for 24 hours prior to inoculation. A hazy, white precipitate should develop in the tubes overnight.

Additional information on this culture is available on the ATCC® web site at [www.atcc.org](http://www.atcc.org).

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

## Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

## Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC
