## Description

**Designation:** Co53 [CIP 104208T]  
**Deposited Name:** *Borrelia coriacea* Johnson et al.  
**Product Description:** Type strain.

## Propagation

### Medium

ATCC® Medium 1914: Revised BSK medium

### Growth Conditions

**Temperature:** 30°C

**Atmosphere:** Microaerophilic

### Propagation Procedure

1. Open thawed vial according to enclosed instructions or visit [www.atcc.org](http://www.atcc.org) for instructions.
2. Aseptically transfer the entire contents to a 5-6 mL tube of #1914 broth. Additional test tubes can be inoculated by transferring one-tenth of the cell suspension to two or three additional tubes of fresh #1914 broth.
3. Incubate at 30°C under microaerophilic conditions for 7-10 days; 6% O<sub>2</sub> is ideal. Use an anaerobe jar with an active catalyst and a microaerophilic gas generator pack or other acceptable method. All tubes should be incubated with caps loosened.

## Notes

Growth usually occurs after 7-10 days. Cells can be monitored under phase microscopy. Keep vial frozen at -70°C or below until ready for use. Then thaw vial rapidly by swirling in a 37°C water bath.

*Borrelia coriacea* is a fragile, sensitive organism that must have the appropriate medium for growth. Rabbit serum is essential for the growth of this organism. Fresh medium enhances growth. Medium older than one month should not be used.

Additional information on this culture is available on the ATCC® web site at [www.atcc.org](http://www.atcc.org).

## References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

## Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

## Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC
