Description

Designation: TW 10-5G
Deposited Name: *Mycoplasma genitalium* Tully et al.

Propagation

Medium

ATCC® Medium 2611: *Spiroplasma* medium

Growth Conditions

Temperature: 37°C
Atmosphere: 5% CO₂

Propagation Procedure

1. Open vial according to enclosed instructions or visit www.atcc.org for instructions.
2. Prepare #2611 broth by adding an additional 5% heat-inactivated fetal bovine serum. The culture may not grow without this additional supplement.
3. Rehydrate the entire pellet with approximately 0.5 mL of #2611 broth. Aseptically transfer the entire contents to a 25 cm² T-flask with 5 mL of 2611 broth. 4. Additional flasks can be inoculated by transferring 0.5 mL of the primary broth tube to these secondary flasks.
4. Incubate at 37°C for 7-14 days in an atmosphere of 5% CO₂.
5. Growth is indicated by a medium color change from red to yellow. Growth can be observed as a thin film of adherent cells to the bottom of the T-flask.

Notes

Growth is enhanced by the addition of 5% heat-inactivated fetal bovine serum and the use of T-flasks and growth vessels.

The depositor has suggested that the initial slow, poor adherent growth may be due to the cryoprotectant. Subsequent transfers show improved growth time.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort
