Description

Strain Designation: C13-9 [MA-2-9]

Deposited Name: *Perkinsus marinus* (Mackin et al.) Levine

Depositor: D Bushek

Isolation:

clone derived from strain C13 (ATCC 50783), which came from eastern oyster, *Crassostrea virginica*, Cotuit, MA, 1998

Propagation

Growth Conditions

Temperature: 25.0°C

Duration: axenic

Protocol: ATCCNO: 50439 SPEC: When the frozen ampule arrives, place it directly into a 35C-water bath and transfer its thawed contents to 14 ml of fresh medium in a T-75 tissue culture flask. Maintain by removing 13 ml of cell suspension weekly and replacing with an equal volume of fresh medium. Alternately, aseptically transfer 1.0 ml of a growing culture to 13 ml of fresh medium in a T-75 tissue culture flask. Please note: This strain has wide tolerances to most environmental variables, i.e., temperature range: 15-35C, salinity range: 10-60 parts per thousand; pH range: 6.0-8.5. The distribution of the species worldwide is not known. In order to avert the introduction of this pathogen into non-endemic areas, all culture wastes must be treated as biohazardous and autoclaved prior to disposal. There are no known mechanisms for eradication of this pathogen from the environment.

Medium

ATCC® Medium 1886: Perkinsus broth medium

References

References and other information relating to this product are available online at www.atcc.org.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at www.atcc.org

Additional information on this culture is available on the ATCC web site at www.atcc.org.
