

Product Sheet

# *Rhodopseudomonas palustris* (ATCC® 51186™)

Please read this **FIRST**

## Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

## Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Rhodopseudomonas palustris* (ATCC® 51186™)

## Description

**Designation:** O.U. 11

**Deposited Name:** *Rhodopseudomonas palustris* (Molisch) van Niel

## Propagation

### Medium

ATCC® Medium 112: Van Niel's yeast agar

### Growth Conditions

**Temperature:** 26.0°C

**Atmosphere:** Anaerobic under a tungsten lamp

### Propagation Procedure

1. Put 6 to 8 ml of #112 broth into a 13 x 100 mm screw cap test tube (small). Add 3% cysteine (stock concentration, 2 ml/100 ml medium) and then fill the test tube to capacity with additional #112 broth. Seal the test tube with a screw cap.
2. Let the tube sit at room temperature for 30 minutes before inoculating it with the rehydrated culture.
3. Aseptically take 0.5 ml of the pre-reduced medium and rehydrate the entire pellet.
4. Transfer the rehydrated pellet back into the screw cap test tube and close tightly. (The test tube should be filled to capacity).
5. Incubate the culture at 26°C under a tungsten lamp.
6. Once growth has been established (three to six days), the culture should be transferred to fresh broth. If a large inoculum is used (1020%), the medium does not need to be pre-reduced.

## Notes

Phototrophic growth is obtained by incubating the culture under anaerobic conditions under a tungsten lamp. This culture is able to grow aerobically on agar (Nutrient) in the dark. Colonies grown aerobically in the dark are reddish-brown, moist, and smooth with entire edges. The centers of the colonies tend to be colored while the edges remain clear.

Additional information on this culture is available on the ATCC® web site at [www.atcc.org](http://www.atcc.org).

## References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

## Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

## Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been
