## Description

**Designation:** AS1 [NCIB 10515]

**Deposited Name:** *Methylophilus methylophilus* Jenkins et al.

**Product Description:** Type strain.

## Propagation

### Medium

ATCC® Medium 1545: Methanol Ammonium Salts Medium

### Growth Conditions

**Temperature:** 30°C

**Atmosphere:** Aerobic

### Propagation Procedure

1. Open vial according to enclosed instructions.
2. Using a single tube of #1545 broth (5 to 6 mL), aseptically transfer 0.5 to 1.0 mL to the vial and rehydrate the pellet.
3. Aseptically transfer the rehydrated pellet back into the broth tube and mix well. Transfer 0.1 mL to slants. Plate 0.1 mL of the culture onto a non-selective medium (plate) to test for purity.
4. Incubate the culture at 30°C for 4 to 5 days. Incubate non-selective plate aerobically.
5. Growth should be detected within 3 to 5 days. Once growth has been detected transfer the culture to fresh broth tubes and slants. No growth should occur on non-selective plate.

## Notes

Microscopic examination shows short, motile rods, generally single, some pairs. This culture is unable to utilize methane, but can utilize methanol or methylated amines as a source of carbon and energy. Additional information on this culture is available on the ATCC® web site at [www.atcc.org](http://www.atcc.org).

## References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

## Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

## Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of materials on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of such materials.
