Designation: pPCC9-5

DNA: cDNA
Insert lengths (kb): 2.0
Tissue: SV40-transformed fibroblast
Gene product: propionyl Coenzyme A carboxylase, alpha polypeptide (propionyl CoA carboxylase, alpha polypeptide) [PCCA]
Alleles: A1, A2, B2, B1

Construct size (kb): 5.199999809265137

Growth Conditions
Temperature: 37.0°C
Medium
ATCC® Medium 1227: LB Medium (ATCC medium 1065) with 50 mcg/ml ampicillin

References and other information relating to this product are available online at www.atcc.org.

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the Biosafety in Microbiological and Biomedical Laboratories from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Homo sapiens (ATCC® 57454™)

Distributed: freeze-dried
