## Description

**Designation:** NRC-1 [JCM 11081]

**Deposited Name:** *Halobacterium sp.*

**Product Description:** Genome sequencing strain. Contains the megaplasmid or minichromosome pNRC100.

## Propagation

### Medium

ATCC® Medium 2185: *Halobacterium* NRC-1 medium

### Growth Conditions

**Temperature:** 37°C shaking

**Atmosphere:** Aerobic

### Propagation Procedure

1. Open vial according to enclosed instructions.
2. Using a single tube of #2185 broth (5 to 6 mL), withdraw approximately 0.5 to 1.0 mL with a Pasteur or 1.0 mL pipette. Rehydrate the entire pellet.
3. Aseptically transfer this aliquot back into the broth tube. Mix well.
4. Use several drops of the suspension to inoculate a #2185 biphasic agar slant.
5. Incubate the tubes and agar slant at 37°C on a shaker for 3 to 7 days.

## Notes

This strain should be allowed to establish growth in the broth tubes for approximately 3 days before transferring to agar plates and/or slant tubes. Biphasic slants are the preferred media, since growth at the interface of the biphasic slant should occur within 3 days. Growth on agar plates (after transfer) will be slow.

Incubating the broth culture on a shaker at 37°C will decrease the time needed to detect growth.

Colonies on #2185 agar plates are entire, glistening, circular, smooth, and pink in color.

Purified genomic DNA of this strain is available as ATCC® 700922D-5™.

Additional information on this culture is available on the ATCC® web site at [www.atcc.org](http://www.atcc.org).

## Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

## Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC
