#### Description

**Designation:** SVAL-D

**Deposited Name:** *Thiomicrospira* sp.

#### Propagation

##### Medium

ATCC® Medium 2228: *Thiomicrospira pelophila* medium

##### Growth Conditions

**Temperature:** 15°C

**Atmosphere:** Aerobic

##### Propagation Procedure

1. Open vial according to enclosed instructions or visit [www.atcc.org](http://www.atcc.org) for instructions.
2. Pre chill media (broth, slant and plants) and keep on ice when working with culture.
3. Rehydrate the entire pellet with approximately 0.5 mL of #2228 broth. Aseptically transfer the entire contents to a 5-6 mL tube of #2228 broth. Additional test tubes can be inoculated by transferring 0.5 mL of the primary broth tube to these secondary tubes.
4. Use several drops of the primary broth tube to inoculate a #2228 plate and/or #2228 agar slant.
5. Incubate at 15°C for 4 to 10 days. Growth should be evident when the broth culture changes from blue to yellow.

#### Notes

On #2228 agar colonies are very small (pinpoint) and white. Cells are small rods that occur singly and in pairs, and very motile. No growth should occur on the nonselective plate.

For best growth use freshly prepared media. An additional transfer may be required after initial 8 days of growth in order to achieve acceptable growth.

Additional information on this culture is available on the ATCC® web site at [www.atcc.org](http://www.atcc.org).

#### References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

#### Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

#### ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

#### Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product.
