Description

A YE-type (episomal) *E. coli*/*S. cerevisiae* shuttle vector permitting RNA synthesis in vitro, visual detection of recombinants, production of single stranded DNA and containing primer sites useful for sequencing

Designation: pRS423

Propagation

1. Open vial according to instructions. 2. Aseptically add 0.3 to 0.4 mL of liquid medium to the freeze-dried pellet and mix well. Transfer 100 μ L to a test tube containing 5 mL LB+ ampicillin (50-100 μ g/mL). A loopful of culture can also be streaked on an agar plate of the same. Incubate cultures at 37°C. 3. Isolate DNA using standard plasmid preparation procedures.

Growth Conditions

Temperature: 37.0°C

Medium

ATCC® Medium 1227: LB Medium (ATCC medium 1065) with 50 mcg/ml ampicillin

Vector Information

Size (kb): 5.797

Vector: pRS423 (phagemid)

Promoters: Promoter T7 (phi10)

Construction: pJS92, pRS303, pBluescript II SK+

Marker(s): ampR, HIS3

Construct size (kb): 5.797

Features: insert detection: lacZ'

marker(s): HIS3

marker(s): ampR

promoter: T3

promoter: T7 (phi10)

promoter: lac

replicon: 2 micron

replicon: f1

replicon: pMB1

MCS: KpnI...SacI

References

References and other information relating to this product are available online at www.atcc.org.

Notes

The beta galactosidase alpha peptide permits blue-white detection of recombinants. The vector also contains the REP3 and FRT sequences necessary for high copy propagation in yeast. In *S. cerevisiae*, the copy number is about 20 per haploid cell. In non-selective growth, plasmids are lost through mitotic segregation at rates in the range of 4.3 +/- 1.3% of progeny doubling.

- Gene (Amst.) 110 : 119-122,
1992 Restriction digests of the clone gave the following sizes (in kb): BamHI 5.8 ; EcoRI 5.8 ; PvuII 3.7,
2.1. ATCC Staff

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC
