## YAC construction vectors kit (ATCC® 77191™)

Please read this **FIRST**

Storage Temp.  
**Store unopened freeze-dried vial at 4°C**

---

Biosafety Level  
**1**

### Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

### Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: (ATCC® 77191™)

### Shipping Information

Freeze-dried *E. coli* containing the plasmid

### Description

This is a kit of the left and right arms of a YL-type *Saccharomyces cerevisiae* yeast artificial chromosome vector (YAC). These YL-type shuttle vectors are useful for construction of genomic libraries. Each plasmid is digested with *Clal* and the cloning enzyme. To recover both ends of a YAC insert as plasmid, DNA of a YAC-containing strain is digested to completion with *BamHI*, *SphI* or *SacI*, diluted, ligated and transformed into *E. coli* (to ampicillin resistance). The insert of a resultant plasmid (which includes the T7 promoter) extends from an end of the YAC insert to the first site of the enzyme used for digestion. Refer to the reference listed below for more specific details about the procedure.

The component vectors, their *Saccharomyces cerevisiae* selectable marker, and their individual ATCC numbers are listed in the table below.

ATCC#	Vector	Yeast Marker
77153	pJS97	URA3
77154	pJS98	TRP1

**Designation:** YAC construction vectors kit

### Distributed In

*Escherichia coli* HB101

### Vector Information

**ATCC® NUMBER:** 77153™

**Designation:** pJS97 plasmid in *E. coli* HB101

**Description:** It contains a promoter, T7, for *in vitro* RNA synthesis and permits recovery of end fragments as plasmids in *E. coli*. The order of major features in this plasmid is: *Clal*/MCS?EcoRI – T7 promoter – ARSH4 – CEN4 – URA3 – SUP11 – pMB1 ori – bla – *SacI* – *BamHI* – *SphI* – TEL.

#### Vector information:

**Vector type:** YL-type shuttle vector

**Vector size (kb):** 7.3

**Markers:** ampR, URA3, SUP11

**Replicons:** pMB1, ARSH4

**Promoter:** T7

**Centromere:** CEN4

**Polylinker sites:** *Clal* *NheI* *NruI* *Sall* *SacII* *NotI* *EagI* *BglIII* *EcoRI*

**Possible hosts:** *E. coli*, *S. cerevisiae*

**Suggested hosts:** *S. cerevisiae* YPH252 (ATCC 204677), YPH274 (ATCC 76622), YPH857 (ATCC 76628)

#### Notes:

Restriction digests of the clone gave the following sizes (in kb): *NotI* – 7.4, *BglIII* – 7.4 ; *EcoRI* – 7.4 ; *SacI* – 7.4. –ATCC Staff

**ATCC® NUMBER:** 77154™ □

**Designation:** pJS98 plasmid in *E. coli* HB101

**Description:** This is a YI-type shuttle vector useful for construction of genomic libraries. It contains promoter for *in vitro* RNA synthesis and permits recovery of end fragments as plasmids in *E. coli*. The order of major features in this plasmid is: *Clal*/MCS/EcoRI – T7 promoter – ARSH4 – CEN4 – URA3 – SUP11 – pMB1 ori – bla – *SacI* – *BamHI* – *SphI* – TEL.

#### Vector information:

**Vector type:** YL-type shuttle vector

**Vector size (kb):** 5.6

**Markers:** ampR, TRP1

**Replicons:** pMB1, ARSH4

**Promoter:** T7

**Centromere:** CEN4

**Polylinker sites:** *Clal* *BstB1* *NheI* *NruI* *Sall* *SacII* *NotI* *EagI* *BglIII* *EcoRI*

**Possible hosts:** *E. coli*, *S. cerevisiae*

**Suggested hosts:** *S. cerevisiae* YPH252 (ATCC 204677), YPH274 (ATCC 76622), YPH857 (ATCC 76628)

#### Notes:

Restriction digests of the clone gave the following sizes (in kb): *NotI* – 5.5, *BglIII* – 5.5 ; *EcoRI* – 5.5 ; *SacI* – 5.5, *Sall* – 5.5. –ATCC Staff

Product Sheet

## YAC construction vectors kit (ATCC® 77191™)

### Please read this FIRST

Storage Temp.  
**Store unopened  
freeze-dried vial  
at 4°C**

---

Biosafety Level  
**1**

### Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

### Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: (ATCC® 77191™)

### Shipping Information

Freeze-dried *E. coli* containing the plasmid

### Propagation

1. Open vial according to instructions.
2. Aseptically add 0.3 to 0.4 mL of liquid medium to the freeze-dried pellet and mix well. Transfer 100 µL to a test tube containing 5 mL LB + ampicillin (50-100 µg/mL). A loopful of culture can also be streaked on an agar plate of the same. Incubate cultures at 37°C.
3. Isolate DNA using standard plasmid preparation procedures.

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

### Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the Biosafety in Microbiological and Biomedical Laboratories from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

### ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

### Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at [www.atcc.org](http://www.atcc.org)

Additional information on this culture is available on the ATCC web site at [www.atcc.org](http://www.atcc.org).
