Description

Designation: [NCMB 1281]

Deposited Name: *Achromobacter fischeri* (Beijerinck) Bergey et al.

Product Description: Type strain. Formerly *Vibrio fischerii*.

Propagation

Medium

ATCC® Medium 101: Photobacterium broth

Growth Conditions

Temperature: 26°C

Atmosphere: Aerobic

Propagation Procedure

1. Open vial according to enclosed instructions.
2. Using a single tube of #101 broth (5 to 6 mL), withdraw approximately 0.5 to 1.0 mL with a Pasteur or 1.0 mL pipette. Rehydrate the entire pellet.
3. Aseptically transfer this aliquot back into the broth tube. Mix well.
4. Incubate the broth tube for 24 to 48 hours at 26°C
5. Transfer can now be made to other tubes of broth, slants, and/or plates.

Notes

Vibrio fischeri (Beijerinck 1889) Lehmann and Neumann 1896 (Approved Lists 1980) and *Photobacterium fischeri* (Beijerinck 1889) Reichelt and Baumann 1973 (Approved Lists 1980) have the same type strain and therefore are homotypic synonyms (Rules 24a and 24b of the International Code of Nomenclature of Bacteria and Viruses).

This strain will grow on Marine Broth 2216 (BD 279110) and Marine Agar 2216 (BD 212185), but Photobacterium Medium is recommended for demonstrating luminescence. To check for luminescence, inoculate a slant, leaving cap loose. Incubate at 26°C for 18 hours. Then, hold in the dark for 10 minutes. If no luminescence is detected, reincubate and check again after 36, 48, and 72 hours. When maximum luminescence is obtained, stopper tightly.

This strain needs to establish good growth in broth culture before additional transfers are made. Additional incubation may be required for growth on solid media.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.
