

Product Sheet

pXC171 (ATCC® 86992™)

Please read this FIRST

 Storage Temp.
Store unopened freeze dried vial at 4⁰ C.

 Biosafety Level
1

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: pXC171 (ATCC® 86992™)

Shipping Information

Shipped: Freeze dried *Escherichia coli* TAP308 containing the plasmid.

 **Description**

One of 12 expression vectors (ATCC 86990-87001) designed to maximize expression from the lambda PL promoter and support cloning of PCR products. The vectors differ in cloning sites and in translational enhancer and initiation sequences. The vector contains a 0.7 kb bovine cDNA that can be excised using the 5 and 3 cloning sites and be replaced by a gene of interest. The bovine insert may be used as a positive control for expression. The lambda R1 terminator is partially deleted. Restriction digests of the vector gave the following results (in kb): BamHI 5.8 ; EcoRI 5.8 ; HindIII 5.8. - ATCC staff
Designation: pXC171

 **Propagation**

aseptically add 0.3 to 0.4 mL of liquid medium to the freeze-dried pellet and mix well. Transfer 100 μ L to a test tube containing 5 mL LB+50mg/mL of ampicillin. A loopful of culture can also be streaked on an LB + amp agar plate. Incubate cultures at 37⁰C. Isolate DNA using standard plasmid preparation procedures.

Growth Conditions
Temperature: 37.0⁰C
Medium

ATCC® Medium 1227: LB Medium (ATCC medium 1065) with 50 mcg/ml ampicillin

 **Vector Information**

Size (kb): 5.7709999084472660
Vector: pXC171 (plasmid)
Promoters: Promoter for expression lambda PL
Construction: pXC23, oligo cassette
Marker(s): ampR
Construct size (kb): 5.770999908447266
Features: initiation codon: ATG
marker(s): ampR
marker(s): tetR
promoter for expression: lambda PL
replicon: ROP copy number control
replicon: pMB1
restriction site: 3' sites HindIII...BamHI
restriction site: 5' ClaI site
ribosome-binding site: synthetic Shine-Dalgarno
spacer sequence: AAAAACATCG
transcription terminator: partially deleted lambda terminator
translational enhancer: T7 gene 10
coding sequence: 14-3-3

 **References**

References and other information relating to this product are available online at www.atcc.org.

 **Biosafety Level: 1**

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth
