Storage Temp.
Store unopened vial at 4°C.

Biosafety Level
1

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: pJIR751 [JIR2439] (ATCC® 87016™)

Shipping Information

Shipped in *E. coli* containing the plasmid.

Description

Shuttle expression vector derived from pJIR418 (ATCC# 77387) permitting expression of antibiotic resistance in both hosts. The erythromycin resistance gene (ermBP), expressed in both *Clostridium perfringens* and *Escherichia coli*, was derived from *C. perfringens* and is inactivated by insertions at the Scal site. The vector contains the following restriction sites (approximate kb from the EcoRI site): BglI 0.2, 2.50; NdeI 0.27, 2.09; PvuI 0.17; PvuII 0.14, 5.78; Scal 4.45; SmaI 4.98. The order of the major features of the plasmid are: lacZ EcoRI/MCS/HindIII lacZ - pIP404 ori rep ermBP pMB1 ori.

Designation: pJIR751 [JIR2439]

Propagation

Aseptically add 0.3 to 0.4 mL of liquid medium to the freeze-dried pellet and mix well. Transfer 100 µL to a test tube containing 5 mL LB+ 150 µg/mL of erythromycin. A loopful of culture can also be streaked on an LB + ery agar plate. Incubate cultures at 37°C. Isolate DNA using standard plasmid preparation procedures.

Growth Conditions

Temperature: 37°C

Medium

ATCC® Medium 2305: 1065 plus erythromycin (150 mcg/ml)

Vector Information

Size (kb): 5.95

Vector: pJIR751 (plasmid)

Promoters: Promoter lac

Construction: pJIR418

Marker(s): eryR

Construct size (kb): 5.95

Features:

insert detection: lacZ'

marker(s): ermBP

other: rep

promoter: lac

replicon: pIP404

replicon: pMB1

MCS: EcoRI...HindIII

References

References and other information relating to this product are available online at www.atcc.org.

Notes

The standard reverse sequencing primer is not useful with this vector due to the duplication of the 181 bp region between pUC18 sites PvuII and EcoRI. Restriction digests of the vector give the following sizes (kb): BglI 3.85, 2.1; PvuI 5.95; SmaI 5.95. -----ATCC staff

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium
