

Product Sheet

## pNKY1009 (ATCC® 87624™)

Please read this FIRST

### Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

### Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: pNKY1009 (ATCC® 87624™)

### Shipping Information

Distributed: freeze-dried

## Description

**Designation:** pNKY1009

**Distribution Host:**

Distribution host: *Escherichia coli* FD 27747 (ATCC 35673)

## Propagation

**Growth Conditions**

**Temperature:** 37°C

**Medium**

ATCC® Medium 2057: M9 salts with supplements

## Vector Information

Size (kb): 9.60

DESCRIPTION OF VECTOR:

Intact vector size: 9.600

Type of vector: plasmid

Cloning sites:

Polylinker sites:

Other unique sites: PvuII

Construction: YRp7, pNKY51

Host range: *Saccharomyces cerevisiae*/*Candida robusta*; *Escherichia coli*

Features (with orientation and position when available):

restriction site: EcoRI

coding sequence: 3' TRP1, <-

coding sequence: hisG, ->

marker(s): URA3, ->

coding sequence: hisG, ->

coding sequence: 5' TRP1, <-

restriction site: BglII

coding sequence: ROP, ->

replicon: pMB1

marker(s): ampR, <-

replicon: ARS1, ->

Vector: pNKY1009 (plasmid)

Construction: YRp7, pNKY51

Marker(s): URA3, ampR

Construct size (kb): 9.60

Features: marker(s): URA3

marker(s): ampR

replicon: ARS1

replicon: pMB1

restriction site: BglII

restriction site: EcoRI

coding sequence: 3' TRP1

coding sequence: 5' TRP1

coding sequence: ROP

coding sequence: hisG

## References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

## Notes

Restriction digests of the clone give the following sizes (kb): BglII--9.6;

EcoRI--5.2, 4.4; BglII/EcoRI--4.6, 4.4, 0.6.

- ATCC staff

*E. coli* containing plasmid should be grown on medium lacking pyrimidines to select for URA3-containing cells.

## Product Sheet

# pNKY1009 (ATCC® 87624™)

- personal communication

The 4.6 kb EcoRI/BglII insert contains two direct repeats of the Salmonella hisG gene flanking URA3 plus TRP1 sequences flanking the hisG-URA3-hisG sequence.  
- Genetics 116: 541-545, 1987

This deleter vector is used to create yeast strains with a trp1 auxotrophic marker deletion.  
- Genetics 116: 541-545, 1987

The two step selection process requires a ura3 transformation host (this host can be created using pJL164 (ATCC 87471)). After transformation with the EcoRI/BglII digested plasmid, URA3 integrants are selected on ura- plates.  
- Genetics 116: 541-545, 1987

The deletion strain is then recovered by selection on 5-FOA plates (loss of URA3 marker by a homologous recombination event between the two hisG repeats).  
- Genetics 116: 541-545, 1987

The plasmid was constructed by inserting the 3.8 kb BamHI-BglII hisG-URA3-hisG fragment into the modified EcoRV site within the TRP1 gene of YEp7.  
- Genetics 116: 541-545, 1987

### Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

### ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

### Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at [www.atcc.org](http://www.atcc.org)

Additional information on this culture is available on the ATCC web site at [www.atcc.org](http://www.atcc.org).
