

Product Sheet

# SRS for Detecting Protein-Protein Interactions (ATCC® 87639™)

Please read this **FIRST**

## Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

## Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: SRS for Detecting Protein-Protein Interactions (ATCC® 87639™)

## Shipping Information

Distributed: freeze-dried

## Description

**Designation:** SRS for Detecting Protein-Protein Interactions

**Distribution Host:**

Distribution host: *Escherichia coli* JM107 (ATCC 47014)

## Vector Information

DESCRIPTION OF VECTOR COMPONENT:

Name of vector: pMS-TRP

Intact vector size: 6.828

Type of vector: phagemid

Vector end: EcoRI

Vector end: XhoI

Cloning sites: EcoRI SacI KpnI XhoI SphI

Polylinker sites: EcoRI SacI KpnI XhoI SphI

Other unique sites: HpaI Swal mLuI NotI BglI MluI BglII

Host range: *Saccharomyces cerevisiae*; *Escherichia coli*

Features (with orientation and position when available):

replicon: 2 micron ori

replicon: f1

promoter: GAL, ->

promoter: T7, ->

other: Myristoylation site, ->

epitope tag: 3x hemagglutinin (HA), ->

MCS: EcoRI...SphI, ->

terminator: CYC1, ->

other: lox site

restriction site: NotI

other: lox site

replicon: pMB1

marker(s): ampR, <-

marker(s): TRP1, <-

Cross references:

## References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

## Notes

Restriction digests of the clone give the following sizes (kb): EcoRI/XhoI--6.8, 0.3; HindIII--4.3, 2.8; XbaI--3.3, 3.3, 0.4, 0.2.

- ATCC staff

Positive control for SOS Recruitment System. The insert contains the leucine zipper motif.

- personal communication

SOS recruitment system (SRS) is a genetic screening method to detect proteins interacting in the cytoplasm. It is based on membrane targeting with a myristoylation signal and SOS-based activation of Ras protein.

- Mol. Cell. Biol. 17: 3094-3102, 1997

## Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

## Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: SRS for Detecting Protein-Protein Interactions (ATCC® 87639™)

## Shipping Information

Distributed: freeze-dried

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

## Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at [www.atcc.org](http://www.atcc.org)

Additional information on this culture is available on the ATCC web site at [www.atcc.org](http://www.atcc.org).
