

Product Sheet

Telmatospirillum *siberiense* (ATCC® BAA- 1306™)

Please read this **FIRST**

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Telmatospirillum siberiense* (ATCC® BAA-1306™)

Description

Designation: 26-2

Propagation

Medium

ATCC® Medium 2644: *Telmatospirillum* Medium

Growth Conditions

Temperature: 28°C

Atmosphere: Anaerobic; 80% N₂-20% CO₂

Propagation Procedure

1. When the Balch tube is ready to inoculate, thaw the frozen vial at room temperature under a gentle stream of oxygen-free gas.
2. For inoculation, use an anaerobic 1.0 ml syringe tipped with 22-gauge needle to withdraw the cell suspension from the vial and transfer it to the broth. Plate 0.1 ml of the inoculated culture onto a non-selective medium and incubate aerobically at 37°C. Use 0.1 ml of the inoculated culture to inoculate a nonselective aerobic broth. Transfer 0.5 ml of the rehydrated culture to an additional tube of #2644 broth. Incubate the broth tubes at 28°C.
3. Growth should be detected in the #2644 broth within 5 to 7 days. There should be no growth detected aerobically.

ANAEROBIC CONDITIONS:

- Tubes of media are placed under a gassing cannula system hooked to a source of oxygen-free gas.
- All transfers are performed while the test tubes are on the cannula system with a gentle stream of oxygen free gas flowing through the system.
- As the test tubes are removed from the cannula system each is sealed with butyl rubber stopper thus maintaining the anaerobic headspace. A 100% nitrogen or 80% nitrogen-20% carbon dioxide gas mixture is typically employed as the oxygen-free gas source.

Notes

In 5 to 7 days, growth is evident in broth by slight turbidity. Cells are Gram-negative motile vibrioid to spirillum shaped cells.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy.
