Description

Designation: JA142 [DSM 19078, JCM 14780]

Deposited Name: *Thiohalocapsa jntuui*

Propagation

Medium

ATCC® Medium 2740: Annexure-I Medium

Growth Conditions

Temperature: 26.0°C

Atmosphere: Anaerobic under fluorescent light at 2000 lux

Propagation Procedure

1. Immediately prior to working with the culture place the frozen vial at room temperature to thaw.
2. Aseptically transfer the entire contents of the vial into a single broth tube (9 ml) of #2740 broth. Mix well.
3. Use several drops of the suspension to inoculate a nonselective agar plate to use as a contamination check. This plate should be incubated in the dark.
4. Incubate the tubes and plate at 26°C for 1 week. Place the tubes of broth under a fluorescent light that reads at a 2000 lux level.

Notes

It is helpful to promote anaerobic growth if the broth tube is 75% full with media. The cells appear healthier in this environment than in a standard 6 ml fill.

On nonselective media, there should be no growth detected after 1 week of incubation. Good growth is indicated by increased pigmentation at the bottom of the broth and should occur after one week of incubation. The cell pigmentation is lavender to purple in coloration. The cells are irregular, non-motile cocci and have visible vacuoles.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort
